Comparison of JExcel Editions

FEATURES	JExcel PRO	JExcel LITE
Excel like UI with in-place editing and issue creation You can edit all the cells (issue fields) inline.	✓	✓
Excel like filtering and sorting You can filter and sort without JQL knowledge just like in MS Excel.	✓	✓
Copy-paste issues and values (internally and to/from MS Excel) You can copy paste values or even whole issues internally and also to/from Excel.	✓	✓
Average/Count/Sum of the selected cells You can see the Average/Count/Sum of selected cells just like in MS Excel.	✓	✓
Column renaming, resizing and freezing You can rename, resize and freeze any column.	✓	✓
Hide/Unhide columns It lets every user have a unique view of their workbook without affecting other users of the given workbook.	✓	✓
Tab coloring You can color the title of your workbooks.	✓	✓
Flag rows (like in MS Outlook) You can flag issues with more colors like in MS Outlook.	✓	✓
No. of Comments and Attachments columns You can see the number of Comments and Attachments for an issue in 2 special JExcel columns. Double-clicking on them will automatically open the sidebar section.	✓	✓
Private, shared and public workbooks Only the authorized users can open your workbooks since their visibility are inherited from the filter of the given workbook.	✓	✓
Data bars You can visualize your numeric columns with databars just like in MS Excel.	✓	✓
Aggregation row for columns See the Minimum, Maximum, Average or Sum of each numeric column.	✓	✓
Easier project and workbook creation You can create a new project (and a new workbook at the same time) by copying the configuration of an existing one.	✓	—
Export to MSExcel/HTML (with comments, images and attachments) You can export issues from JExcel to MS Excel or to HTML with comments, images and attachments.	✓	—
Import issues from MS Excel You can import issues from MS Excel into JExcel.	✓	—
Calculated colums You will be able to make simple calculations in JExcel. Just like you would do in a spreadsheet.	✓	—
Fast filter for columns A brand new and extremely fast data filtering method. Hold „Alt" and „Left-click" in a cell to easily filter by its data.	✓	—
"Change history" of cells You can see the change history of a particular cell.	✓	—
Collaboration You can invite people to work with you on workbooks and see who is working on a workbook right now.	✓	—
Priority support Your bug reports and feature requests come first!	✓	—
